

Church Safety **DRILL LOG**

Conducting regular safety drills with your congregation can help prepare members to respond quickly and correctly if an emergency happens at your church.

Adventist Risk Management, Inc. provides a number of safety drills and encourages churches to practice at least one safety drill every year. The fourth Sabbath in March each year is designated as Safety Sabbath and serves as an opportunity to educate members about the importance of safety and practice a safety drill.

Use this form to track each safety drill performed. This will help your safety officer and safety committee understand what is working well and what areas still need improvement.

For more information Safety Sabbath and to find resources to help you conduct a safety drill at your church, visit safetysabbath.org.
